EDUCATION

M.Sc. in Electrical Engineering and Control Systems <i>INP-ENSEEIH, Toulouse, France</i>	2029
B.Eng. in Electrical Engineering and Industrial Computing <i>University of Toulouse (IUT GEII), Toulouse, France - Minor: Robotics - GPA: 4.0/4.0</i>	2026
French Baccalauréat (High School Diploma) <i>Lycée Ozenne, Toulouse, France - Majors: Mathematics and Computer Science</i>	2023

EXPERIENCE

National University of Singapore (NUS) - Research Engineering Intern <i>Singapore</i>	May - Jul 2026
– Designed and integrated tactile sensors for a robotic manipulation platform. – Built a teleoperation system to collect data and train Visual-Tactile-Language-Action (VTLA) models.	
LAAS-CNRS - Research Engineering Intern <i>Laboratory for Analysis and Architecture of Systems, GEPETTO team, Toulouse, France</i>	Mar - May 2026
– Designed and implemented tactile sensors on a robot for the deployment of a VTLA model.	
LAAS-CNRS - Research Engineering Intern <i>Laboratory for Analysis and Architecture of Systems, Toulouse, France</i>	May - Jul 2025
– Designed and integrated the first complete version of an instrumented insole. – Measured foot motion and contact forces to characterize gait kinematics.	
IUT GEII, Toulouse - Tutor <i>Tutored first- and second-year students in lectures, tutorials and lab sessions</i>	Oct 2024 - Jan 2026

SKILLS

Programming C/C++, Python, VAL3; PLC programming; agentic coding (Claude Code, Codex)
Embedded Systems STM32, ESP32, Arduino, Raspberry Pi; I²C, SPI, UART, ESP-NOW, HTTP
Electronics Design Proteus, KiCad; PCB design and prototyping
Robotics and AI VLA/VTLA models, teleoperation data collection, tactile sensing; MuJoCo simulation
3D CAD and Fabrication OnShape, Fusion 360, TinkerCAD; 3D printing, laser cutting, soldering
Verification Unit and integration testing; debugger, oscilloscope, datasheet analysis
Languages French (native), English (fluent)

PROJECTS

Physical AI Hackathon - EPFL AI Team <i>Lausanne, Switzerland</i>	May 2026
– Won 2nd place in the Hardware Track. – Trained a VLA model on a Hugging Face SO-101 arm for grasping tasks; monitored environmental data with an ESP32.	
Wall-E Animatronic (personal project) <i>Life-sized animatronic: mechanical, electronic and software design</i>	2023 - 2025
– Modeled and 3D-printed every part; motorized head, arms and tracked base, with speech playback. – Presented at RoboHacks by Innate, Y Combinator, San Francisco.
